Advocacy Report
for
Lake Burley Griffin and Lakeshore Landscape

Lake Burley Griffin is a complex and significant national heritage lake system and its lack of heritage protection is a critical concern. Lake Burley Griffin Guardians (the Guardians) was established in 2015 to address the lack of heritage listing for the lake and its environment and issues concerning impact on heritage values. In 2 years membership has risen from 12 to 77 financial members and the group has become incorporated. Its membership has a range of professionals including a few with heritage backgrounds.

The Guardians are very busy keeping up with a spectrum of concerns associated with the lake including substantial submissions on major planning proposals as well as continuing advocacy on political aspects associated with protecting national heritage, that include information stands, petitions, a public meeting, meetings with politicians and bureaucrats, letters to politicians, attending Joint Standing Committee (JSCNCET) meetings, presentations, preparation of a heritage report and NHL nomination, liaison with community councils, presentation walks and liaison with ICOMOS. There is a great deal of information about the Guardians and their activities, copies of submissions, heritage reports etc that can be viewed at:
Website: Lakeburleygriffinguardians.org.au
Facebook: www.facebook.com/Lake-Burley-Griffin-Guardians-1797781033814906/

Liaison with ICOMOS includes preparing a heritage@risk report and preparation of a Heritage Alert. Copies can be made available by contacting: Juliet.Ramsay@gmail.com
